Career Objective: As a MERN Stack Developer, I am committed to delivering high-quality web applications and contributing to innovative digital solutions. My goal is to leverage my expertise in HTML5, CSS, Javascript, React.JS, and related technologies to create engaging and efficient user experiences. I am a hard-working person and still learning to develop my next level of programming.

Skills:

Expertise: React.JS, HTML5, CSS, Tailwindcss, Bootstrap, Daisyui
Comfortable: JavaScript, Note.JS, MongoDB
Familiar: Express.JS, Firebase Authentication, JWT
Tools: Github, Netlify, VS Code, Chrome Dev Tool, Figma, Versal, React Dev Tool
Interpersonal: Team leadership, Teamwork, GitHub-team-mention

Experience:

I have experienced **2** months of demo internship for learning team projects from Programming Hero, and I have team leadership experience of **2** months.

Projects-

1: Flex Flow (Team project)

   [Live site Link](#) || [Github Clint Site Code](#) || [Github server Code](#)
- Flex Flow is a Movie and TV series streaming site.
- **Technology:** JavaScript, React.Js, Node.Js, Firebase, MongoDB, Express.Js, Vercel, Netlify
- **Features:** (which I have implemented)
  - ➢ There are several types of filter options, like by region TV series.
  - ➢ After playing the TV series, it will show the remaining episodes below
  - ➢ TV series section, TV series details, similar episodes, Register, Login, and Shorts.
  - ➢ User management system dashboard for user and admin

2: MR Academy   (Personal project)
[Live site Link](#) || [Github Clint Site Code](#) || [Github server Code](#)
- MR Academy is a learning platform.
- **Technology:** JavaScript, React.Js, Node.Js, Firebase, MongoDB, JWT, Express.Js, Vercel, Netlify
- **Features:**
    - ➢ User management system dashboard for user instructor and admin
    - ➢ Admin sees all user's names, emails, and photo
    - ➢ User login redirects to the dashboard for the user, instructor, and admin(jwt)

3: Toy Bazar (Personal project)
[Live site Link](#) || [Github Clint Site Code](#) || [Github server Code](#)
- Toy Bazar is a toy buy-selling platform.
- **Technology:** JavaScript, React.Js, Node.Js, Firebase, MongoDB, Vercel, Netlify
- **Features:**
    - ➢ All toys pages have all user toys list
    - ➢ Add toy and my toy pages are Private When the user login access
    - ➢ Add Toy page user adds her toys and my toy pages user sees her toys

Education:
Bachelor of Arts in History (second year)
Chuadanga Government college
National University of Bangladesh.
Status**:** Running

Course:
Complete Web Development Course
From programming-hero
Batch-7
Status**:** Complete
